Idaho Power Internship Graduate Opportunities Program 2024

Description

Idaho Power is excited to introduce the Graduate Internship Opportunities Program for individuals seeking to embark on a rewarding career in the energy industry. As a graduate intern, you will play a pivotal role in contributing to innovative projects, working alongside seasoned professionals, and gaining hands-on experience in various facets of the utility sector.

Responsibilities

- Assist in the development and implementation of energy efficiency and sustainability initiatives.
- Support research, data analysis, and reporting on energy generation, transmission, and distribution projects.
- Contribute to the planning and execution of community outreach programs and educational initiatives.
- Collaborate with cross-functional teams on engineering projects, system upgrades, and infrastructure improvements.
- Provide support in monitoring and analyzing power system performance and reliability.
- Participate in safety training and ensure compliance with industry regulations.
- Engage with various teams to understand the full spectrum of utility operations and regulatory compliance.

Qualifications

- Currently enrolled in a graduate program with a focus on engineering, energy management, sustainability, or a related field.
- Strong academic record and a genuine interest in the energy industry and sustainable practices.
- Excellent written and verbal communication skills.
- Proficient in Microsoft Office Suite and basic computer skills.
- Ability to work independently and collaboratively within a team.
- Detail-oriented with strong organizational and multitasking abilities.
- Demonstrated commitment to safety and understanding of energy industry regulations.

Experience

Previous coursework or experience in engineering, energy management, sustainability, or a related field is preferred but not required.

Skills

- Analytical skills for data interpretation and problem-solving.
- Strong interpersonal skills and the ability to work with diverse teams.
- Adaptability and a willingness to learn in a dynamic energy environment.
- Time management skills with the ability to meet deadlines.
